

Everyone that parks on the USM campus in the Bedford Street Garage has to use the digital parking system. You can pre-register for your parking session or do it upon arrival.

You must begin your digital parking session within 10 minutes of parking OR pre-schedule your session prior to arriving. To begin your digital parking session at the garage, use your mobile device to scan the QR code signage posted in the parking garage or parking lot. This will connect you to our digital parking system. You can then select your parking session duration, license plate number, and payment information. You can also pay for your parking on the parking website prior to arriving or by downloading the Honk Mobile app for Android or IOS. You will need your license plate number when beginning your digital parking session.
